

CFS++ Development Server

Collaboration Environment for FEM Software

Home Trac CDash SVN Documentation File Management Administration About

Welcome to the development server for the Finite Element Package CFS++ (Coupled Field Simulation in C++).

This is a joint work of the following institutions:

- Department of Sensor Technology (University Erlangen-Nuremberg)
- Group of Applied Mechatronics (University of Klagenfurt)
- Department for Applied Mathematics II (University Erlangen-Nuremberg)

In case of any questions, please contact the [administrator](#).

Welcome to the LSE Software Portal

This portal is meant to support the developers of CFS++. It consists of three elements

- A wiki, where, in contrast to <http://lse10/mediawiki> code specific issues are to be discussed
- A ticketing system to organize bug and enhancements requests
- A web frontend to the svn software repository

Welcome to the LSE Software Portal
Actual Discussions
CFS Developer and User
LSE and General Trac Stuff

Actual Discussions

- [ElementSpace](#) -- Development page for the next major milestone
- [RefactorCode](#) -- Discussion on refactoring CFS
- [NewInfo](#) -- Request for comments on info file
- [TestSuite](#) -- Missing Testcases / improvements
- [CodeIssues](#) -- Strange code, candidates to delete, copy & paste hell
- [CFSTool](#) -- Collect wishes and ideas for cfs tool.
- [StudentJobs](#) -- Stuff that could be done by Students

CFS Developer and User

- [GID/ANSYS/CFS Tutorial](#) -- Up-to-date beginner's tutorial (nightly updated!)
- [DocCenter](#) -- Center of CFS++ documentation stuff
- [Doxygen Docs](#) -- More or less up to date
- [CDash](#) -- CFS++ dashboard for results of automatic builds and test runs
- [CFS hacking](#) -- Scripting (xml, gid) and hacker tricks
- [DevelopCFS](#) -- How to work on the CFS++ code
- [Solver-Performance](#) -- Comparison of different Solvers
- [CoolTools](#) -- Tools which might be useful for developers

CDash - CFS
